HotspotBnB Whitepaper

Release 0.0.1

Author(s): Wave Telecom Ltd

Nov 15, 2019

CONTENTS

Hotspot BnB
FREE INTERNET ACCESS
NOW POSSIBLE & PROFITABLE!

Title	Website Address	Description
api	https://api.hotspotbnb.com	3rd party integration tools
blog	https://blog.hotspotbnb.com	latest blogs from all areas
docs	https://docs.hotspotbnb.com	hotspotbnb document library
status	https://status.hotspotbnb.com	status of the hotspotbnb network
store	https://store.hotspotbnb.com	hotspotbnb hardware, shipping & retail
support	https://support.hotspotbnb.com	ticket support system, customers & b2b
network	https://hotspotbnb.com	networks & hotspot, leasholding & more
security	https://security.hotspotbnb.com	physical, cyber and info security/ defence
corporate	https://corporate.hotspotbnb.com	compliance, policy, shareholders, reports etc
advertising	https://ads.hotspotbnb.com	display, video and text advertising portal
application	https://app.hotspotbnb.com	free hotspotbnb application
mining (crypto)	https://mining.hotspotbnb.com	cryptocurrency mining rig for miners
operating system	https://os.hotspotbnb.com	free hotspotbnb operating system
exchange (stock)	https://exchange.hotspotbnb.com	fiat & cryptocurrency, real-time trading

ONE

GLOSSARY

1.1 Release Notes and Notices

This section provides information about what is new or changed, including urgent issues, documentation updates, maintenance and new releases.

1.1.1 Version 0.0.1

This is the first release/ draft of this technical document.

Older Versions

There are no older versions of this document:

Table 1: Table 1.0 - Older Versions of this Document

N/A

1.1.2 Known and Corrected Issues

Below is a table of pending issues which have been reported to our team. These issues will be cleared from this list as and when they are remedied.

Table 2: Table 1.1 - Known Issues

date	version	subject	description
01-11-2018	0.0.1	N/A	no doubt many issues to report - first draft only

Comments - none

1.1.3 Recently Updated Topics

Nothing significant to report

1.2 Our vision

The United Nations once estimated that by 2020 the entire world would be online. The year has arrived, yet 3.2 Billion people are still without internet access. New reports indicate it may actually now take until 2050 to get everyone online.

The ideal remedy to this problem would be a solution which makes internet access free for end-users while simultaniously compensating the internet service providers for maintaining the network, e.g. advertising revenue etc. Sadly the road to such a solution is littered with the carcasus of companies which have all tried and failed at this, including Facebook and Google. This is fast becoming one of the biggest humanitarian and commercial opportunities of our time.

HotspotBnB® has been a silent underdog in this race. Origonally called Wave, this project was founded and financed by a team of British Defence Communications Engineers back in 2012, with a plan to develop the worlds first free internet solution. By 2017 HotspotBnB® earnt itself several international patents and a Loon Balloon contract from Google. HotspotBnB.com builds on these successes, taking humanity a further step closer to free internet access.

HotspotBnB offers Wi-Fi hotspots which top themselves up, using advertising revenue and cryptocurrency smart contracts. The solution is able to generate a profit. Furthermore HotspotBnB's website allows anyone to lease-own these public Wi-Fi hotspots and share the profits as part of a 3 - 36 leasehold agreement. Profits depend on a number of factors including the cost of data in the region where the hotspot exists, the population density and demographics of audiences and even the redundant processing power of connected mobile devices.

This whitepaper aims to provide the reader with a proper understanding of how HotspotBnB® works. The document will be revised to maintain an acurate and current representation of the technology platform.

1.2.1 Our Belief

We believe a fully connected world is a better one. When you empower anyone with internet access their ability to contribute and generate value for themselves and their society, grows exponentially.

HotspotBnB® sees itself bridging the gap between hundreds of millions of people without internet and a modern world of digital service providers, which until now have been struggling to reach offline and off-grid people in a commercially viable way.

This all begins with an online index of all the regions in the world without internet access, overlayed with real plans for introducing infrastructure to these regions, including ready-to-go products, humanitarian aid workers and engineers in the region.

Every aspect of HotspotBnB's wireless communications infrastructure differs from existing telecommunications infrastructure. Our hardware is pioneering in energy efficiency, speed and durability. We also developed our own operating system and applications to operate these pioneering products. Furthermore we have an entire suite of online portals for our partners in advertising, cryptocurrency mining, humanitarian aid and defence.

WaveOS™ is free and open-source (GitHub). The latest compiled version of the software is also free to download from our website for anyone already in possession of a Single Board Computer e.g. Raspberry Pi - https://wave.hotspotbnb.com/download.html.

Thank you for your time reading this. We've been Wave® and you've been great.

1.3 Environment

This appendix includes the following topics:

- Regulatory Compliance
- Warranty Information

1.3.1 Regulatory Compliance j

1.4 Market Size
